## **Cisco Power Calculator - Power Results**

Disclaimer: The Cisco Power Calculator is intended to be an educational resource and a starting point in planning your power requirement; it is not a final recommendation from Cisco. This tool does not check for software compatibility. To determine the power requirements and software most appropriate for your company we suggest you work with a Cisco representative, Cisco channel partner or a solutions provider.

## **Product Family: Catalyst 3560CX**

| Power Consumption/Heat Dissipation Summary |                                 |   |                                    |   |                                 |  |  |
|--|---------------------------------|---|------------------------------------|---|---------------------------------|--|--|
| Product                                    | Percentage of PoE<br>Power used | Total PoE Output Power<br>Available (W) | Total PoE Output Power<br>Used (W) | Total PoE Output Power<br>Remaining (W) | Total Heat Dissipation (BTU/Hr) |  |  |
| 3560CX-8XPD-S                              | 22.71%                          | 240.00                                  | 54.50                              | 185.50                                  | 174.27                          |  |  |

| Switch Details |   |  |  |  |  |  |  |
|----------------|---|--|--|--|--|--|--|
| Product        | Switch Power Consumption (with no PoE Devices)(W) | Heat Dissipation (with no PoE Devices)(BTU/Hr) |  |  |  |  |  |
| 3560CX-8XPD-S  | 35.2  | 141.42   |  |  |  |  |  |

| Quick Facts  |                     |  |
|--|---------------------|--|
|  | Selected Product    | 3560CX-8XPD-S  |
|  | Product Description | 3560-CX Switch 6 GE PoE+, 2<br>MultiGE PoE+, uplinks: 2 x 10G<br>SFP+, IP Base |
| Catalyst 3560-CX Series  Concord Conco | Rack Unit           |  |

| PoE Devices Details             |          |                                 |                           |  |  |  |  |
|---------------------------------|----------|---------------------------------|---------------------------|--|--|--|--|
| PoE Devices                     | Quantity | Powered Device Output Power (W) | Heat Dessipation (BTU/Hr) |  |  |  |  |
| AP-1200 with a+b radios (11.6W) | 1        | 11.60                           | 6.99                      |  |  |  |  |
| AP-1200 with g radio (6.5W)     | 1        | 6.50                            | 3.92                      |  |  |  |  |
| AP-1100 with b/g radio (4.9W)   | 1        | 4.90                            | 2.95                      |  |  |  |  |
| AP-1200 with a radio (8.5W)     | 1        | 8.50                            | 5.12                      |  |  |  |  |
| AP-1200 with b radio (6.2W)     | 1        | 6.20                            | 3.74                      |  |  |  |  |
| AP-1200 with a+g radios (12.4W) | 1        | 12.40                           | 7.47                      |  |  |  |  |
| AP-1200 with no radio (4.4W)    | 1        | 4.40                            | 2.65                      |  |  |  |  |
|                                 |          | Output Power (W)                | Heat Dessipation (BTU/Hr) |  |  |  |  |
|                                 | Total    | 54.50                           | 32.84                     |  |  |  |  |
